<u>Overview</u>

Indianapolis Office

12 Mo Deliveries in SF

12 Mo Net Absorption in SF

Vacancy Rate

9.7%

Market Asking Rent Growth

1.4%

Early in 2025, vacancy of 9.7% in the Indianapolis office market has been mostly flat, increasing by 40 basis points over the past 12 months, and is sitting above the longer-term averages for the area. For context, the 10year average vacancy rate is 8%. The area continues to weather weakened fundamentals like net absorption at -300,000 SF, while deliveries of completed office space totaled 200,000 SF over the past 12 months, with construction continuing on 1.1 million SF.

Demand for space has been softened recently, with net absorption in negative territory for three out of the past eight quarters. The largest office lease recorded over the past 12 months occurred in September 2024 when the Indiana Members Credit Union (IMCU) signed a 74,000 SF lease in the CBD at 835 N College Ave. with a movein date in May 2025. This IMCU location will anchor the Bottleworks District, occupying approximately 85% of the total available office space in this phase of the project's development.

Availability for office space of 10.7% has remained flat over the past 12 months and is well below the national average of 16.1%, a continuation of the decade-long trend of Indianapolis area office availabilities remaining tighter than the national average.

Although office sector weakness continues nationwide, Indianapolis has a diverse array of office-using tenants that have helped it perform better than many markets, especially coastal tech-oriented cities. Top industries operating in the area include agribusiness, logistics, manufacturing, information technology, and life sciences. In addition, the sports industry has a substantial presence with the NCAA headquarters and the Indianapolis Motor Speedway. Annual Rent growth has declined by approximately 90 basis points since last year and is currently at 1.3%. Average office rents are sitting at \$22/SF but range from \$19.60/SF at 1 & 2 Star office properties to \$25/SF for 4 & 5 Star office space. Geographically speaking, office rents are highest to the north of the downtown area, with Carmel garnering the highest average office rents at \$25.65/SF. Other leading submarkets for rent include Keystone Crossing, the Meridian Corridor, and Fishers/Geist. The base case forecast projects rent growth hovering around the current level through the end of 2025.

KEY INDICATORS

Indianapolis' office market has experienced softness in recent years, with negative demand in four out of the past eight quarters. Over the past twelve months, 320,000 SF of office space has been returned to the market, with demand in the 4 & 5 Star category experiencing positive absorption of 240,000 SF while demand at 3 Star office space and below was negative.

The total amount of sublet space available has declined from a high of 1.4 million SF reached during 23Q2 to 1 million SF as of 24Q3. Ten subleases, ranging in size from 964 SF to 15,000 SF, have been signed over the past six months with an average starting rent of \$21.71/SF. Among the 317 direct leases signed over the same six-month period, the average deal size was 3,580 SF, with an average starting rent of \$17.79/SF. Over the past 12 months, most of the 752 deals were signed for three years or below, with starting rents under \$30/SF. The average deal for this cohort was 3,665 SF, with starting rents averaging \$21.97/SF. A typical deal near the past year's average lease size was signed in August 2024 by Culwell Legal for 3,597 SF in the CBD, with an asking rent of \$19/SF. Financial, insurance, and service firms continued driving demand for office space. The Indiana Members Credit Union signed the two largest leases, each for 74,000 SF in the CBD.

4 & 5 Star office space is experiencing the highest vacancy level at 15.7%, while 3 Star office space has had relatively flat vacancy near 10.1%. Meanwhile vacancy at 1 & 2 Star office space is the lowest in the area, at 6.1%.

CARMEN

Indianapolis Office

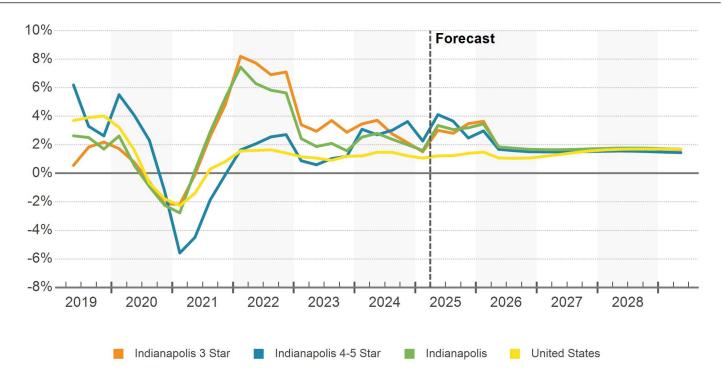

Indianapolis is relatively affordable compared to many of the top office markets nationwide, with average rents of \$22/SF, roughly 39% below the national benchmark. The average asking rent for 4 & 5 Star space is \$25/SF, about 8.7% above the average for 3 Star space. This difference in rents across quality subtypes is a relatively modest premium compared to the U.S. overall, where the spread is closer to 50%.

The pacing of rent growth has been inconsistent over the past decade, ranging from a low of -3% to a high of 7.4%, with an average of 2.7% annually over this period. Since early 2021, annual rent growth in Indianapolis has consistently exceeded the national average to varying extents. However, this gap has narrowed in recent quarters, with Indianapolis' rent growth at 1.3%, approximately 20 basis points above the national average. Even with the consistently higher rent growth

over the past few years, average office rents in Indianapolis are 38% lower than the national average.

Annual rent growth among 4 & 5 Star office properties increased to 1.7% after being negative at this time last year, marking an improvement. Meanwhile, rent growth has been strongest over the past 12 months in the 3 Star office space, which experienced growth of 1.4%.

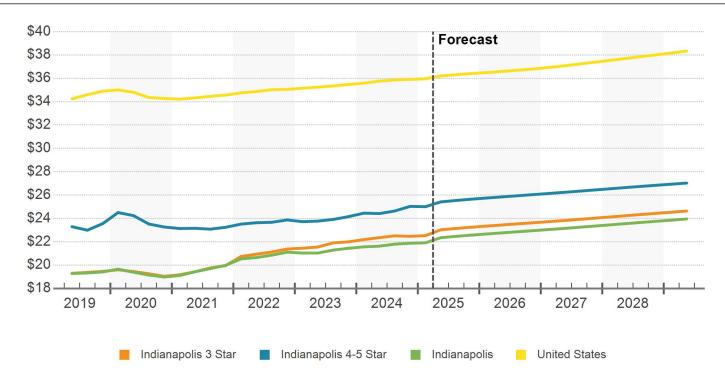

Location is a key differentiator when it comes to rent levels. Rents are highest in the Indianapolis CBD and in the submarkets north of it, including Carmel, Meridian Corridor, Fishers/Geist, and Keystone Crossing, all of which have average rents over \$23.40/SF. Rents are lowest in submarkets further from the city's urban core, including Shelby County and Anderson/Madison County, where rents average just below \$18.75/SF.

West County	\$0.44	\$0.65	\$0.20	\$2.08	\$2.77	\$6.14

Expenses are estimated using CMBS, NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

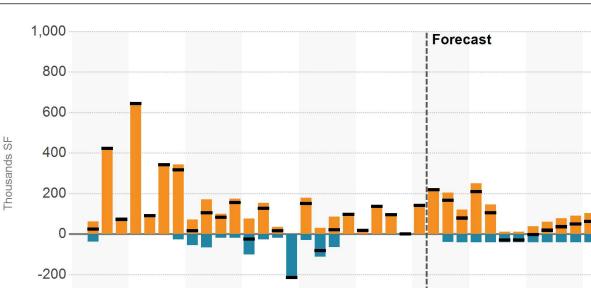

Development activity continues in Indianapolis, with 200,000 SF of office space delivered here over the past 12 months. These recent deliveries were almost evenly split between 4 & 5 Star and 3 Star properties, while 1 & 2 Star inventory was decreased by 2,100 SF. Over a slightly longer time frame, the office space inventory in Indianapolis has increased by 1.7 million SF over the past five years.

Construction is underway on 1.1 million SF, about 1% of the area's current office space inventory and slightly above the average of 870,000 SF underway over the past five years. However, the pipeline should be winding down as construction starts cut off after 24Q1, with no groundbreakings since February 2024. Deliveries of office projects currently underway should be wrapping up midway through 2026. The largest office project underway, the 250,000 SF Indiana University Health building in the Midtown Submarket, should be delivered in February 2026.

Geographically speaking, the largest amount of space is underway in the CBD, with two properties totaling 312,000 SF. This includes the 205,000 SF Eleven Park Office and buildings 9-12, encompassing 107,000 SF at the Bottleworks.

Over the past 12 months, delivery of part of the Bottleworks project accounted for half of the area's 200,000 SF in office space completions. This 100,000 SF 4 Star office was delivered in June 2024 and is fully occupied. Medical office properties were popular, with three buildings completed over the past year. The largest among these was a 28,800 SF 3 Star building in Greenwood, which was delivered in January 2025.

Annual sales activity of \$347 million from 240 recorded transactions is up from the lowest volume level in a decade recorded last year, and activity is still underway as well-leased properties with lower availabilities, investment-grade leases, and healthcare-related assets continue to experience less pricing deterioration. The current sales volume was driven almost equally by sales of 4 & 5 Star office properties worth \$139 million and by sales of 3 Star properties worth \$134 million, while 1 & 2 Star office sales totaled \$74.3 million.

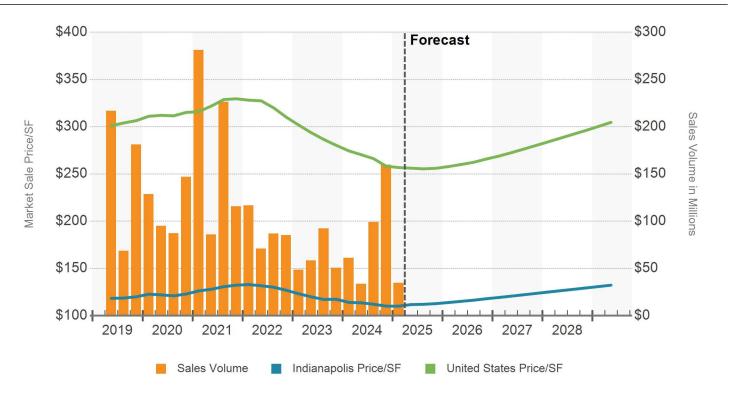

Over the past decade, private investors have contributed about 70% of the area's sales volume, while the next highest contributor was owner-users, with 13% of sales volume. The trend of private investment in the area increased over the past 12 months, with private investors accounting for 79% of office sales volume.

The top office transaction in Indianapolis, in terms of sales volume, over the past 12 months occurred in

October 2024, when KennMar LLC purchased the Capital Center North Tower for \$26.5 million (\$78.66/SF) from Zeller. This was part of a portfolio sale that included both towers of Capital Center with a total sale price of \$35 million (\$78.51/SF).

Demand for medical office assets remained healthy and has represented about 14% of the area's sales volume from 25% of the recorded transactions over the past 12 months. The average sale price among this group was \$1.4 million (\$98/SF) at an 8.7% cap rate. A typical transaction for this cohort occurred in June 2024 when Grace Homecare purchased the 2 Star Colson Professional Building in the Edgewood/South County Submarket for \$1.26 million (\$99.18/SF). This 12,704 SF property was fully occupied at the time of sale.

The average sale price has drifted down to \$59/SF over the past year while the cap rate increased by approximately 30 basis points to 10.8%.

CARMEN

Indianapolis has experienced population growth of 2.2% since 2020, twice the national average. Factors influencing attracting new residents over the past few years include relative affordability and job opportunities. Indianapolis has a lower cost of living than the national average and diverse industry sectors, including manufacturing, healthcare, logistics, and tech. Roughly 27,000 new jobs were added in Indianapolis over the past 12 months, growing by 2.3%, while the national growth rate over the same period was at 1.4%.

Indiana University-Purdue University Indianapolis, the University of Indianapolis, Butler University, and Marian University have boosted Indianapolis's skilled talent pool. About 34% of the population over 25 have a bachelor's degree or higher. The average home price of \$221,900 is below the US average, and apartment rents are 24% below the national average.

The office-using sector is primarily around downtown Indianapolis, Carmel, Keystone Crossing, and the North Meridian Corridor. Although hybrid work has altered space needs, continued demand has been boosted by tech, finance, healthcare, life science, and legal and professional services firms. OneAmerica Financial Partners, a life insurance and financial services company, and Elevance Health, a major health insurer, have headquarters in downtown Indianapolis. The area also has a strong tech presence, represented by Salesforce, Infosys, Zotec Partners, and Genesys. Leading healthcare companies Eli Lilly and Roche Diagnostics have corporate offices and research locations throughout the area.

The Indianapolis area is a major logistics hub with a strong manufacturing presence. FedEx has one of its largest locations at the Indianapolis International Airport, while UPS operates a regional super hub and other facilities. Other major 3PLs in the area include XPO Logistics and Geodis. In addition, Amazon has several large sorting and fulfillment centers in the area. On the manufacturing side, Allison Transmission is headquartered in Indianapolis, while aerospace firm Rolls-Royce North America and auto parts manufacturer Borg Warner operate here. Roche, Eli Lilly, and Covance represent the life science and pharmaceutical industry. PepsiCo, Nestle, and Sysco are food and beverage businesses with major production, food processing, and distribution centers in the area. Due to Indianapolis's centralized position, an eight-hour drive to approximately 80% of the US population, major retail distribution centers are from companies like Walmart, Target, and Best Buy.

In recent years, several major infrastructure projects have been undertaken to improve transportation and expand industrial capacity. These include interstate projects focusing on the I-69 finish line project connecting the area with Evansville and the reconstruction of the North Split Interchange. Meanwhile, the capacity of the Indianapolis International Airport was increased with new cargo facilities and the modernization and expansion of the FedEx hub.

Completed transaction data is based on actual arms-length sales transactions and levels are dependent on the mix of what happened to sell in the period.
Market price trends data is based on the estimated price movement of all properties in the market, informed by actual transactions that have occurred. The price index is not smoothed.
